SPOOR & FISHER NOTIFICATION OF TRANSMITTAL OF SPOOR & FISHER PO Box 41312 THE INTERNATIONAL PRELIMINARY 2024 Craighall 2001 -06 **EXAMINATION REPORT** AFRIQUE DU SUD SEEN (PCT Rule 71.1) MAIL INPRUMA **Vate** d mailing ENTERED AV 25.06.2001 (dey/r onth/year) Applicant's or agent's file reference IMPORTANT NOTIFICATION PA 126894/PCT International application No. international filing date (day/month/year) Priority date (day/month/year) PCT/IB99/00546 30/03/1999 Applicant ATTIEH, Mark, Russell

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will propare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted: see separate sheet

VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made: see separate sheet

INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

Re Item V

Reasoned statement under Art. 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

- D1: WO 96 13814 A (VAZVAN BEHRUZ) 9 May 1996 (1996-05-09)
- D2: WO 97 45814 A (VAZVAN BEHRUZ) 4 December 1997 (1997-12-04)
- D3: WO 98 42173 A (LAI ITI SEPPO ENSIO ;TELAMA SAMI PEKKA (FI); FD FINANSSIDATA OY (FI)) 1 October 1998 (1998-10-01)
- D4: WO 98 34203 A (QUALCOMM INC) 6 August 1998 (1998-08-06)
- D5: US-A-5 221 838 (FINKELSTEIN LOUIS D ET AL) 22 June 1993 (1993-06-22)
- The present application does not satisfy the criterion set forth in Art. 33(3) PCT 1. because the subject-matter of independent claims 1 and 22 is not inventive starting from document D1 (see the abstract) and taking into account the person skilled in the art of mobile telephones with SMS (short message service). The argumentation of the applicant in favour of inventive step in his letter dated 17.04.2001 has not convinced the examiner, because independent claims 1 and 22 do not seem to be limited to transactions between two bank accounts, whereby only communication of a telephone number over a public communication network is required. In the opinion of the examiner the independent claims also include the case of transactions between a mobile telephone user and a mobile phone systems provider of the type "telephone bill", i.e. a cellular phone logs in into a system of a phone provider automatically transmitting its telephone number. The charges are stored in an account in a database of the provider corresponding to the telephone number and (later) debited to a bank account of the user. Furthermore, independent claims 1 and 22 do not appear to exclude that apart from the telephone number also other data relating to the transaction are transmitted over the public communications network.

Independent claims 21 and 24 do not contain any concrete technical features ans should have been deleted, see item VIII below.

INTERNATIONAL PRELIMINARY Inte

2. Dependent claims 2 - 20 and 23 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of inventive step, because the feature of claims 3, 7 and 13 is already known from D1 (see page 3, line 7 - page 5, line 13 and the features of all other dependent claims are already contained in any conventional GSM cellular phone network with SMS.

Re Item VII

Certain defects in the international application

In order to meet the requirements of Rule 5.1(a)(ii) PCT, D1 should have been cited in the description and the relevant background art disclosed therein should have been briefly discussed.

The independent claims should have been drafted in the two part form, whereby the features known from D1 should have been placed in the preamble (Rule 6.3(b) PCT).

The features of preamble and characterizing part of all the claims should have been provided with reference signs placed in parentheses (Rule 6.2(b) PCT).

Re Item VIII

Cortain observations on the international application

Claims 21 and 24 are unclear, because they do not contain any concrete technical features, Art. 6 PCT. Claims which relate to the description and drawings are not permissible, see Rule 6 2(a) PCT and the Guidelines PCT/GL/3, III, 4.10. These claims should have been deleted.

Claim 22 is formally unclear, Art. 6 PCT, because it is directed to a system, however, appears to contain mainly features defining a process. The wording of a claim should leave no doubt having regard to its category (system or method), see the Guidelines PCT/GL/3, III, 4.1.

INTERNATIONAL PRELIMINARY

International application No. PCT/IB99/00546

EXAMINATION REPORT - SEPARATE SHEET

The present set of claims contains 24 claims. The teatures of most of the dependent claims are anticipated by a conventional GSM cellular phone network will SMS (see also the above item V). Proliferation of a large number of dependent claims containing trivial features should be avoided. Therefore, the present application does not meet the requirement of conciseness, Art. 6 PC1.

The vague statement in the description on page 7, last paragraph implies that the subject-matter for which protection is sought may be different to that defined by the claims, thereby resulting in lack of clarity (Article 6 PCT) when used to interpret them (see also the PCT Guidelines, III-4 3a).
